Presented by James Ball, Ed.D, BCBA-D and Phoenix Center Staff

Understanding systematic techniques for teaching students on the autism spectrum in the classroom as well as the community. This presentation will discuss systematic techniques for teaching students with an autism spectrum disorder. It will focus on teaching specific skills, enhancing motivation, and generalization training. A step by step demonstration will be presented using real life examples. Modifications will be explored that allow this particular program to be effective with students significantly challenged with Autism Spectrum Disorder. A panel discussion, chaired by Dr. Ball, and comprised of a cross-disciplinary group of Phoenix Center staff will discuss practical applications of the strategies presented for classroom and community settings.

Participants will be able to:

- Identify three reinforcement techniques.
- Implement three specific teaching techniques.
- Design an individualized teaching program.
